DETAILED ACTION

Claims 1-25 are pending in the present application, and they are subjected to the following restrictions.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-15 and 22, drawn to methods for producing functional antigen presenting dendritic cells from an extracorporeal quantity of a subject's blood, classified in class 435, subclasses 2, 377.
- II. Claims 16-21 and 23-25, drawn to a method for producing functional antigen presenting dendritic cells from an extracorporeal quantity of a subject's blood, said method comprising the step of coating disease effector agents in the extracorporeal quantity of blood with monoclonal antibodies having a free Fc segment, classified in class 435, subclass 2; class 424, subclass 141.1.

The inventions are distinct, each from the other because of the following reasons:

The methods of Groups I-II are distinct one from the others as they are drawn to methods having different starting materials and different method steps and therefore they require different technical considerations for achieving the desired end-results. For example, unlike the methods of Group I, the method of Group II requires the step of coating disease effector agents in the extracorporeal quantity of blood with monoclonal

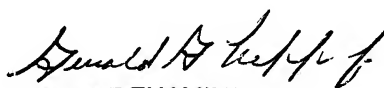

antibodies having a free Fc segment. Additionally, the methods of Groups I-II can be carried independently one from the other.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and separate search requirements (e.g., different classification), it would be unduly burdensome for the examiner to search and/or consider the patentability of all the inventions in a single application. Therefore, restriction for examination purposes as indicated is proper.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Quang Nguyen, Ph.D., whose telephone number is (703) 308-8339.
